

**LEADING WORLD BUSINESS**

**BAUMA 2010**

## The UK Group at Bauma

I am pleased that the Construction Equipment Association, with the support of UK Trade & Investment will again bring a large UK Group to exhibit at Bauma 2010. UK exhibitors can be located on the UK Pavilion in Hall A5 and in product areas around the exhibition.

The UK construction equipment industry is worth £8.5 billion a year to the British economy and its influence can be seen in virtually every country in the world. Such a powerful industry demands a powerful voice. With over 100 member organisations – including original manufacturers and suppliers – the Construction Equipment Association (CEA) represents some of the world's biggest UK-based names.

We support our members' interests by promoting their world-class research and development, manufacturing skills and cutting-edge products, all of which play a vital role in shaping our world. We also help influence legislation and EU and global regulation. One of the ways we do this is by being an active member of the EU's Committee for European Construction Equipment, as well as the lead organisation in CESAR, a hugely successful plant security scheme.

If you'd like any further information, please visit the UK Information Centre in Hall A5 stand 413 or our web site - [www.coneq.org.uk](http://www.coneq.org.uk)

A handwritten signature in blue ink that reads 'Rob Oliver' followed by a horizontal line.

Rob Oliver, CEA Chief Executive

The UK Group at Bauma 2010 is supported by UK Trade & Investment (UKTI) – the Government organisation that helps UK-based companies succeed in an increasingly global economy.

A range of expert services, advice and support are tailored to the needs of individual businesses to maximise their international success. UK Trade & Investment also helps overseas companies bring high quality investment to the UK's economy – acknowledged as Europe's best place from which to succeed in global business. UKTI also provides support and advice to investors at all stages of their business decision-making.

UK Trade & Investment offers expertise and contacts via a network of international specialists throughout the UK, British Embassies and other diplomatic posts around the world. Staff can assist at all stages of the business planning cycle, from inception to completion.

For further information visit [www.ukti.gov.uk](http://www.ukti.gov.uk)

**THE UK CONSTRUCTION EQUIPMENT INDUSTRY**  
**A message of support from the Secretary of State.**

The Construction Equipment Industry in the UK is an important element of this country's engineering capability and is a cornerstone of the UK manufacturing base.

Manufacturing matters. As we clearly outlined in the Government Strategy produced in September 2008, *Manufacturing: New Challenges, New Opportunities*, manufacturing is recognised as critical to the success of the UK economy.

Over one third of the earthmoving equipment made in Europe comes from the UK, with the sector exporting over 70 per cent of its UK production. Not only is this an extensive range of finished equipment – but we also have countless component and accessory suppliers and specialist service providers. This is a position of which we should rightly be proud.

Companies in the UK have many great strengths which have helped them drive forward key developments in equipment and product design and technical innovation, so there is no doubt we have the skills and capabilities to continue to succeed in the global market place. What we must ensure is that we get this message out to our potential customers across the world. Working with industry and the Construction Equipment Association (CEA), UK Trade & Investment (UKTI) will continue to play a key role in ensuring the very best of what the UK has to offer is available to those who wish to use UK equipment, components and services.

Both BIS and UKTI have a long history of engagement with and support for the sector in the UK and working with the CEA. I am therefore delighted that BIS and UK Trade & Investment are able to support this important CEA-led UK Group at Bauma 2010 to showcase the wide range of high quality innovative products, technological developments and expertise the UK construction equipment industry can offer.

The Rt Hon Lord Mandelson

First Secretary of State, Secretary of State for Business, Innovation & Skills,  
 Lord President of the Council

Company Name **AFT Trenchers Ltd (Hall B3, Stand 211)**

Contact Name Mr. Harry Jurgens

Email [harry@trenchers.co.uk](mailto:harry@trenchers.co.uk)

Telephone + 44 (0) 28 8673 7878

Product(s) Tracked Containerisable Conveyor Units from 20ft to 75ft Wheeled Containerisable Conveyor Units from 20ft to 80ft. Optional, Hydraulics, Electrics, Self Powered, Direct Feed Grids, Folding, impact beds, and covers.

New Products TR7542 – is a 75ft (22.6Mtr) long tracked conveyor capable of in excess of 750tph. This unit if fully containerisable without any dismantling and operate as a link conveyor, stockpiling conveyor, or shiploader. ST80 – is an 80ft (24Mtr) long wheeled conveyor capable of handling up to 600tph. This unit is available as a hydraulic coupling, electric coupling, or self powered Diesel Unit.

Industry Sector Targeted Quarrying, Recycling, C&D, Shiploading, & any materials moving.

Target Regions/ Countries Worldwide

| Product(s)               | The Official Construction & Agricultural Security and Registration Scheme was designed to combat the estimated 4.5 billion euro problem of machinery and equipment being stolen across Europe by organised criminal networks. The CESAR Scheme has been operating very successfully in the UK supported by the Home Office, Police, Leading Insurers, OEM's and trade associations and has dramatically reduced the number of machines stolen and helping to increase the number of stolen machines recovered. The next stage of development for the Official CESAR Scheme is for it to be adopted across Europe and the Police. |

| Product(s)   | DHCR1500R, a test solution designed for testing the very largest mobile machinery with a maximum theoretical power of over 1MW.   |
| New Products | <p>Test kit, designed in collaboration with a major US mobile machinery manufacturer, enables the operator to measure flow, pressure and temperature while simultaneously loading the system using the purpose built pressure loading valve. The HV1500 is designed to allow the operator to simulate the machine circuit under normal conditions by restricting the flow and, hence, increasing the pump's operating pressure.</p> <p>Despite the large flows and pressures involved the valve can be operated with one hand and can be used to increase the load smoothly. The valve, like all Webtec HV series load valves, features a built-in burst disc safety mechanism to prevent over-pressurisation that could otherwise damage the test kit and circuit under test. Rated to a maximum of 1500 lpm and 420 bar with code 62 two inch fittings, the DHCR1500R test kit is available to order now.</p> |

 Telephone + 44 (0) 1621 745 900  
 Products Youngman Group is a leading supplier of aluminium and fibreglass access towers, small scissor lifts, Lighting towers, stagings, work platforms, ladders, step ladders, aluminium unit beams and, bespoke access solutions and events products.  
 New Products **Ecolite**, is a range of **environmentally friendly** lighting towers. They are **energy efficient**, offering **fuel savings of around 80%** compared with conventional lighting towers. The lighting heads are on a 9.0m fully hydraulic mast using **bio-degradable** water based fluid. Dusk-to-dawn auto switching is available. The trailer mounted T version has an AMOSS (automatic mast operating safety system) making it impossible to tow with the mast erected. The Ecolite P is a boxed 4 way palletised version. **BoSS X-Series Micro Scissor Lifts:** X2, 3X and x3x versions together with the latest specification, auto-braked BoSS X3 micro scissor lift. The products all auto braked with tilt sensors and incorporate rigid box-section steel scissors, quality heavy duty componentry and serviceable items in a pull-out compartment for easy inspection and maintenance. The X2 has a 2.01m platform height which is reached in 10 seconds. **The BoSS X3X** with three longer scissors has platform height of 3.2m without the need for additional stabilisers. This is 0.65 m higher than the X3.
